

Day 2 - April 29, 2017

Second day of the seminar and it was a great day. The 3 emcees starts the session with ZUMBA and introduce the facilitator for the morning, they are Viofyle and ~~they~~ ^{Janine Rajardo} will be discussing RELIGION and for the afternoon Johnny and Lezel will discussed RACE and ETHNICITY. A job well done from them, They are good and best among the best. I like their energy and eagerness to their best during their presentation. They have an interaction between participants and that's a good thing to continue. Participants enjoyed the activity specially in a small group sharing outside the venue that everyone's share and talk w/ their peers. They tend to make everyone's happy also.

Day 3 - April 30, 2017

The last day of the seminar. Me and my partner Jade are task to discussed HIV/AIDS and for the afternoon Honey Bee and Benmar will discussed LGBTQ. Atlast we made the seminar/camp best and north for all. All of us congratulate ourselves for the success of the program.

The last part of the program is giving of certificate to be give by Miss Amanda to participants and facilitators after that we made a surprise to Miss Amanda, we gave her a sash made by paper and for our mentor we gave them a dictionary we made (HUGAYNON - ENGLISH) and also a sash and for the 3 facilitators from Camarines we also gave them a sash too. This ~~will~~ will serve as a remembrance and by showing gratitude to them - for all their efforts and help for us.

All are excited to go home but facilitators and us Peace Corps remain at the venue. We arrange and clean all scattered things after that we have a charings about the past session, activities and the things we learned from this camp. Some of us were very emotional because of the reason that the camp is over, we don't each other again and the friendship we build and treasured in the short period of time that we develop it. Also I am glad that our mentor Miss Danielle and sir Chris gave us remembrance which is a letter and stating that we are best and they are very thankful to have us and for choosing their topic which is HIV/AIDS.

From this camp, on the different topic such as GENDER, PWD, RELIGION, RACE & ETHNICITY, HIV/AIDS, and LGBTQ I learned that we must be an open-minded enough to accept different ideas and opinions either positive or negative one. We must be considerate from one another, most of the time we should trust other people as we trust ourselves or being ourselves, we should not discriminate and judge a certain person by just looking on their physical appearance, we should treat them equally for whoever they are and the most important thing is COLLABORATION instead of COMPETITION that leads to have a best understanding and better DIVERSITY.
