Frank,

Thank you so much for your quick turn around and approval

We are progressing very well on our project, we have so far finished the wiring and started on the fence foundation. We have been offered the land adjacent to our building at MK450,000.00. and we would like to extend and purchase that land.

The community anticipated that they will make savings and is proposing to adjust the budget and reallocate some funds from the cement budget line (MK225,000) and windows (MK175,000), They are proposing that if the project contributes this, they will be able to raise the MK50,000 to pay for the land
