

# Hope for Ghana

Dear Houssaynatou,

Thank you so much for reaching out to Hope for Ghana about a memorial project in Ghana in memory of your mother. Your \$5000 donation will be used towards our Mobile Medical Outreach initiative.

Hope for Ghana intends to purchase vital medical supplies, screening tools and medications that will be used for the outreach programs. And your donation will allow us to purchase a Ghana “tricycle” that will be used for desperately needed mobile medical outreach to villages presently without access to health care.

This “poor man’s version” of a mobile medical van is an amazing way for medical outreach teams to reach the most remote Ghanaian communities that are in dire need of medical care. Medical screenings, health education and counseling, and mass vaccination initiatives are just the beginning of what is possible. Serving also as an ambulance, this simple vehicle will save countless lives and change healthcare in Ghana.

Hope for Ghana is thrilled to collaborate with a dear friend and fine young family medicine doctor, Dr. Joel Duah, who brings his passion, understanding of community health, and tireless commitment to taking care of the most deprived communities. He will be in charge of all outreach activities in addition to ensuring the safety and maintenance of the tricycle. He practices medicine in the Bono East Region of Ghana, where your donated vehicle will serve the many Zongo Muslim communities.

Houssaynatou, Hope for Ghana is excited to begin work on this project immediately. Your generous donation will change healthcare access in Ghanaian villages forever. Thank you for your immense generosity.
