RE: Unique Foundation, The Gambia

I am very pleased to recommend Unique Foundation to worldconnect US .

Unique Foundation runs a community-based education centre in The Gambia that offers opportunities for underprivileged children in the community to complete secondary school.

It supports school going and non-school going children by providing children access to free study facility, mentors, and tutors and learning materials such as text books.

Currently the centre has more than 80 children that attend its free tuition remedial classes.

The centre also helps unschooled and unskilled adult and young people gain income generating skills such as graphic design and basic compute math, and reading and writing of simple English.

Book Aid International entered into partnership with Unique Foundation in 2018, sending a range of children's books to be used in the centre and for outreach.

I visited the centre in October 2018 and observed that the books were well displayed and being used by the students. We hope that the books donated to the centre will make a great difference in the community, improving illiteracy and increasing the culture of reading.

Unique Foundation is a small agency but with its excellent and committed leadership much has been achieved on a modest budget. With support, they can grow their work and make a real difference in their community.

Yours sincerely,

Alison Tweed

Chief Executive
