World Connect

Dear Sir/Madam,

Recommendation Letter for SEED FOR CHANGE

We would like to recommend SEED FOR CHANGE for partnership for development work they undertake. SEED FOR CHANGE is a young development agency we have worked with to reach out to our current groups of women and youth with our Solar Hubs project. They have been able to identify, train and mentor the women and youth for us. With their business development services they have been able to support our cause for bringing solar energy closer while helping these groups to earn an income to keep their group and personal activities going on. We would love to see SEED FOR CHANGE succeed as we continue working together. Your support is necessary.

DigiTal Wizards is a technology based company trading in smart solar technologies and accessories. We supply small lanterns, home systems, irrigation pumps both for commercial and home. We also design customized systems to suit clients' needs. In our current project we are installing Solar Hubs, centralised solar systems for electricity and water provision in remote off grid villages. In this project we intend to work with women groups and youth to be custodians of the system and management. So making sure that the groups are equipped is very vital. This is where our partnership with SEED FOR CHANGE comes into clear picture.

We are very delighted to see our coherent approach helping out in development of Malawi through rural empowerment.

Please contact me for any further information.

Thankfully yours.
Fishani Msiska
