

**PROJECT NAME: 'BARONGO
EVERGREEN FARM
INVESTMENTS (BEFi).'**

THE BEFi PROJECT EXPLANATIONS

The Barongo Evergreen Farm Investments (BEFi) project started as a Tanzanian physically disabled (paralyzed legs and walks with a crutch) person's self-help, small-scale farming and agriculture support initiative efforts, thereafter, together with my spouse, we improved, innovated and formalized into a sustainable conservation farming and agriculture social enterprise business development remedial solution to POVERTY and HUNGER challenges start-up project with humanitarian purposely made practical disability friendly participation facilitating opportunities for the traditionally long directly or indirectly neglected and excluded from various social opportunities, the desperate poor, non-educated, non-skilled and worst-served, male, female and older people with physical disabilities who can't engage and participate in productive living activities on their own without the purposely made disability friendly participation facilitating opportunities, as we couldn't help not to re-call of the own experienced POVERTY and HUNGER challenges survival initiative effort resulting pains that accompanies disability lives. Our humanitarian facilitating initiative support is purposely intended to engage and empower people with physical disabilities through our farming and agriculture social enterprise business project's activities alongside sustainable food/financial earning returns.

The project's sustainable farming and agriculture business activities are increasingly purposely physically eased and allocated to both disabled and non-disabled individual participants according to each's physical nature, ability and talents alongside sustainable food/financial earning returns, where assistance is required all project activity participants are to share the hand for the benefit of all, targeting to gradually extend further and cover other Tanzania regions' districts and beyond with our peculiar humanitarian purposely made practical disability friendly participation facilitating opportunity model through collaboration or cooperation partnership approach with other disability empowerment interested stakeholder parties and entities as our project grows and expands.

BEFi INITIAL INVESTMENT (1a)

BEFi Sources Of Original Funds

THE BEFi PROJECT BUDGET AND INITIAL SOURCE OF FUND

-Total initial project budget:\$130,616.00
-Contributed by founders:\$39,387.00
-Raised from relatives and friends: <u>\$13,129.00</u>
	\$52,516.00
-The fund amount being sought:\$78,100.00

BEFi PROJECT BUDGET AND FUNDING NEED

- We started small with our own savings and support from relatives and friends by first investing in land purchase at Soga, Kibaha District, Coast Region, Tanzania. Established a small-scale self-help farm and started constructions of the now progressing farm house/poultry house building structures, planted land/farm surrounding teak trees, planted now yielding various food/commercial fruit trees, growing of same food/commercial miscellaneous crops, to raise commercial chickens (now keeping few for trials) for the local market and beyond. The grant funds resource being sought will facilitate us finish the project's farm house/poultry house building structures on-going construction progressing work which will include making these building structure entries easily accessible by us all disabled and non-disabled, installation of rain water harvesting facilities and digging of water boreholes for simple drip irrigations (focusing on continuous food/commercial miscellaneous crop harvestings, crop rotations and controlling of crop wastes), area fencing, project accessing to electrical/solar powers and acquiring of other essential project utilities thus make the project fully operational, triggering further involvement of more people with physical disabilities together with additional of food/commercial pawpaw, mushrooms, bee hives and fish keeping products production facilities and land expansions, one after another.

**Thank you for your time and
attention in viewing/reading our
‘BEFi’ social enterprise start-up
remedial solution project .**

‘Please support our started
endeavor.’
