Dear Madam,

### **RE: RECOMMENDATION FOR MUSHOTA COMMUNITY CARE COALITION**

I write to recommend Mushota Community Care Coalition for your support.

Mushota Community Care Coalition is one of a bona fide community based groups working in Ilombe ward of Pambashe Constituency. Its core activity is to provide care and support to vulnerable and disadvantaged households and; support community development in many aspects, including health care, food security, education, women empowerment, water and sanitation.

This community-based organization has adequate capacities in the implementation and management of activities. And to date; it has accumulated a very good list of achievements in community development. Among these includes: facilitating formation of 8 women's and youth groups; capacity building 6 groups in leadership and linking them to FISP; satisfactory implementation of two small water supply projects in Mushota and Buyaka areas which has benefited over 250 households; mobilizing of community members in Nachampama area to mould bricks for community school construction and; improved working relations with other likeminded groups and, collaborating with other organizations and institutions.

As the office of the Area Member of Parliament, we keep inventory of all groups, clubs and organisations working in the constituency and periodically check on them to see what they are doing.

I guarantee that, as an office, we are familiar with this organization, their activities and their target beneficiaries. It is my belief that, if this organization is supported, it will help targeted beneficiaries improve their social-economic status.

Yours faithfully,

Siyanga Paul  
Professional Assistant  
For/Area MP Hon. Chitotela
