The Directorate of Health –FATA highly appreciate the support and cooperation of Community Oriented Rural Empowerment (CORE) in identification of paramedic staff and assessment in five tehsils of Bajaur and Mohmand agencies. During the assignment period from March 2016 to May 31, 2016 the organization was found very hardworking and dedicated to assigned task.

The CORE dedicated efforts, facilitation in assessment, identification of paramedics, Jobs description development and capacity building trainings made it possible to accomplish the assignment in timely manner. The organization support and expertise are highly appreciated and commendable.

Our team members found Community Oriented Rural Empowerment (CORE) a very professional and dedicated organization working for the development and relief of communities. On the behalf of the department I strongly recommend the Community Oriented Rural Empowerment (CORE) for working together with us in future or to be a partner with any reputable organization for the development and relief activities especially in health sector.

Sincerely,

Chief Health Sector Reforms Unit
