RE: GREENING 4 GROWTH (G4G) PROJECT

I write in response to your letter dated 15th October 2017 on the above subject. I wish to confirm on behalf of Adidome Farm Institute (AdFI) our interest in the above mentioned project. We support the project and it aims to provide generations of students with environmental education opportunities, a source of fruit for improved school lunch nutrition and rural communities access to healthy food.

We agree to implement the project in partnership with TRADE. Our role specifically will be to provide training for project staff and location to setup project nursery in the Central Tongu district of the Volta Region.

We believe G4G addresses issues critical to educating, assisting and inspiring school children & communities to grow, steward, and utilize perennial fruit trees as yet not addressed elsewhere in Ghana. G4G project is in line with the goals and aspirations of AdFI, and our mission to develop and manage qualified human resource in promoting environmental sustainability in Ghana.

We therefore fully support this initiative and look forward to this highly productive collaboration with your organization.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Joseph Kwesi Sarpong'.
