Dear Sir,

LETTER OF REFERENCE FOR MR. NJEKE JOSHUA EGBE

I am writing to recommend the services of Agri-Life Association towards the community and their great positive impact towards environmental conservation. I met your applicant (Njeke) in the year 2013 when he was working as volunteer in my Non-Governmental Organization (Green Cameroon). We were both engaged in environmental and agricultural projects especially women empowerment issues. He was outstanding with his regular hard work and supervision skills which included monitoring and evaluation of each project we carried back then.

Being a graduate with a major in social and management Science Geography and a Minor in the field of Environmental Sciences, He is also an agricultural and social entrepreneur, founder of Agri-Life Association-business in the latter half of 2014, which uses poultry to create jobs through value chain to solve high youth's unemployment. Part income generated from his farming projects is reinvested to train youths in prison.

Over the years, he and his team have been carrying out campaigns on organic farming by donates animal waste as natural fertilizer to local farmers playing a huge part in soil conservation and to improve on agricultural yields.

He is an outstanding team leader who admires and abides in hard work, great responsibility, creativity, teamwork and innovations.

I am happy to recommend Agri-life Association and its Leader Njeke Joshua. If you have any question, do not hesitate to contact me.

With High Regards,

MASANGO S. SONE
EXECUTIVE DIRECTOR
